

zone maintenance schedule

Explanation of the routine maintenance schedule.

There are two maintenance teams which operate simultaneously in the zones. Each team works in the nominated zone for a week before moving onto the next zone. Requests are prioritised for action while teams are in the zone. If a request is not completed during this time, it will be reprioritised and done the next time round.

There may be some variation within the schedule due to weather conditions, volume of work, plant breakdowns, special events, etc

Please note: Grass mowing of recreation reserves and parks, garden-bed maintenance, and street sweeping are not included in these routine maintenance programs.
